4. There are various studies that utilize this software. The program allows you to create questionnaires that ask patients about any symptoms they might be having while receiving treatment. Please create a form for the study \_\_\_\_\_

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 4 comments

5. Name this form \_\_\_\_\_. The form will need to assess these symptoms. a. Palpitations a. Palpitations

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

5. b. All eye disorders

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

5.c. two additional symptoms of your choice

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 5 comments

6.Would it be helpful to have groups of common symptoms or disease-specific question sets in building these forms?

- No
- Yes
- conditional
- Explanation

Question 6 comments

Great, now please advance to the next screen

7.Now, you will generate a schedule for this form. The schedule should have the participant fill it out on day 1 of each 21 day cycle, for 4 cycles.

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

## Question 7 comments

8. Future versions of this software would allow you to create scheduling templates and integrate the patient

9.a. palpitations or blurry vision

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

9.b. with a frequency greater than or equal to

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

9.c. This form should notify the treating physician, site CRA and nurse

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

## Question 9 comments

10. This is a multi-site study, should local sites be able to change the notification scheme?

- No
- Yes

11. What would be your preference on when and how to receive notifications? As a (type of clinical provider, MD, nurse, etc), what are your thoughts on this function? Would you want these notifications sent to the Cancer Adverse Event Reporting System (caAERS)?

12. Great please save and continue to the next screen. Now review the questions. Is it easy to review the questions and determine if you included all the items of interest?

13. Now we are going to move on to a different set of tasks, which involve monitoring forms. ..

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 13 comments

14. a. How many forms are scheduled for the participant this month?

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

14. b. How many forms are scheduled for the participant complete next month?

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

## Question 14 comments

15. Sometimes a form

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

## Question 15 comments

16. a. Next, add a new subject to the \_(site Usability)\_ study.

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

16. Attempts

16.b. Are there any fields that you think should be added or removed from this section?

17. Please choose to change the notification scheme or not and select

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

## Question 17 comments

18. Now verify that this person was added

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 18 comments

19. Now we are going to look at reports for a form that has already been filled out. Subject `_(A_A)_` has completed a form called `_(Sample Data)_`

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 19 comments

20. Please pull up a graph for the symptom

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 20 comments

How is the symptom

21.a. Overall study report. What do you think of this report?

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 21 a. comments

21.b. Symptom summary report. Is this useful for data analysis?

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 21 b. comments

22. Now let

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 22 comments

23. Now we are going to move on to a different set of tasks. Please return to the home page.

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

24. You may recall that we set up

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Note how participant accesses the alerts (circle one):

- Date
- Participant ID
- Actions

Question 24 comments

25. Once you are finished reviewing them, clear the alerts and return to the home page.

- 0-Task not completed...
- 1-Task performed after multiple prompts and/or help
- 2-Completed with single prompt
- 3-Achieved task with confusion or with multiple inappropriate clicks
- 4-Task performed with hesitation or single error
- 5-Completed task easily

Question 25 comments

26. What are your thoughts about how these alerts are displayed? Are they useful?

27. This portion of the usability testing is complete. We really appreciate your willingness to use this software and share your thoughts about it.
