

Mr./Ms. [name] had a [insert: heart attack, stroke, peripheral vascular disease, TIA], but s/he is not listed as being on a statin drug. People who have had cardiovascular disease are at high risk of future similar events. VA/DoD Guidelines recommend this patient be on at least a moderate-potency statin.

During this visit did you start [or stop, if risk <6%] a statin medicine?

- Yes
 No

If not, why not?

- After discussion, the patient decided against statin
 Strong history of nonadherence
 Allergy/Intolerance
 I think this patient's life expectancy is <5 years
 Already receives a statin from another source
 The reminder is incorrect and s/he was placed in an incorrect risk category. (Please note the way the risk category is wrong in comments)
 I do not think s/he needs one. (Please explain why not in comments)
